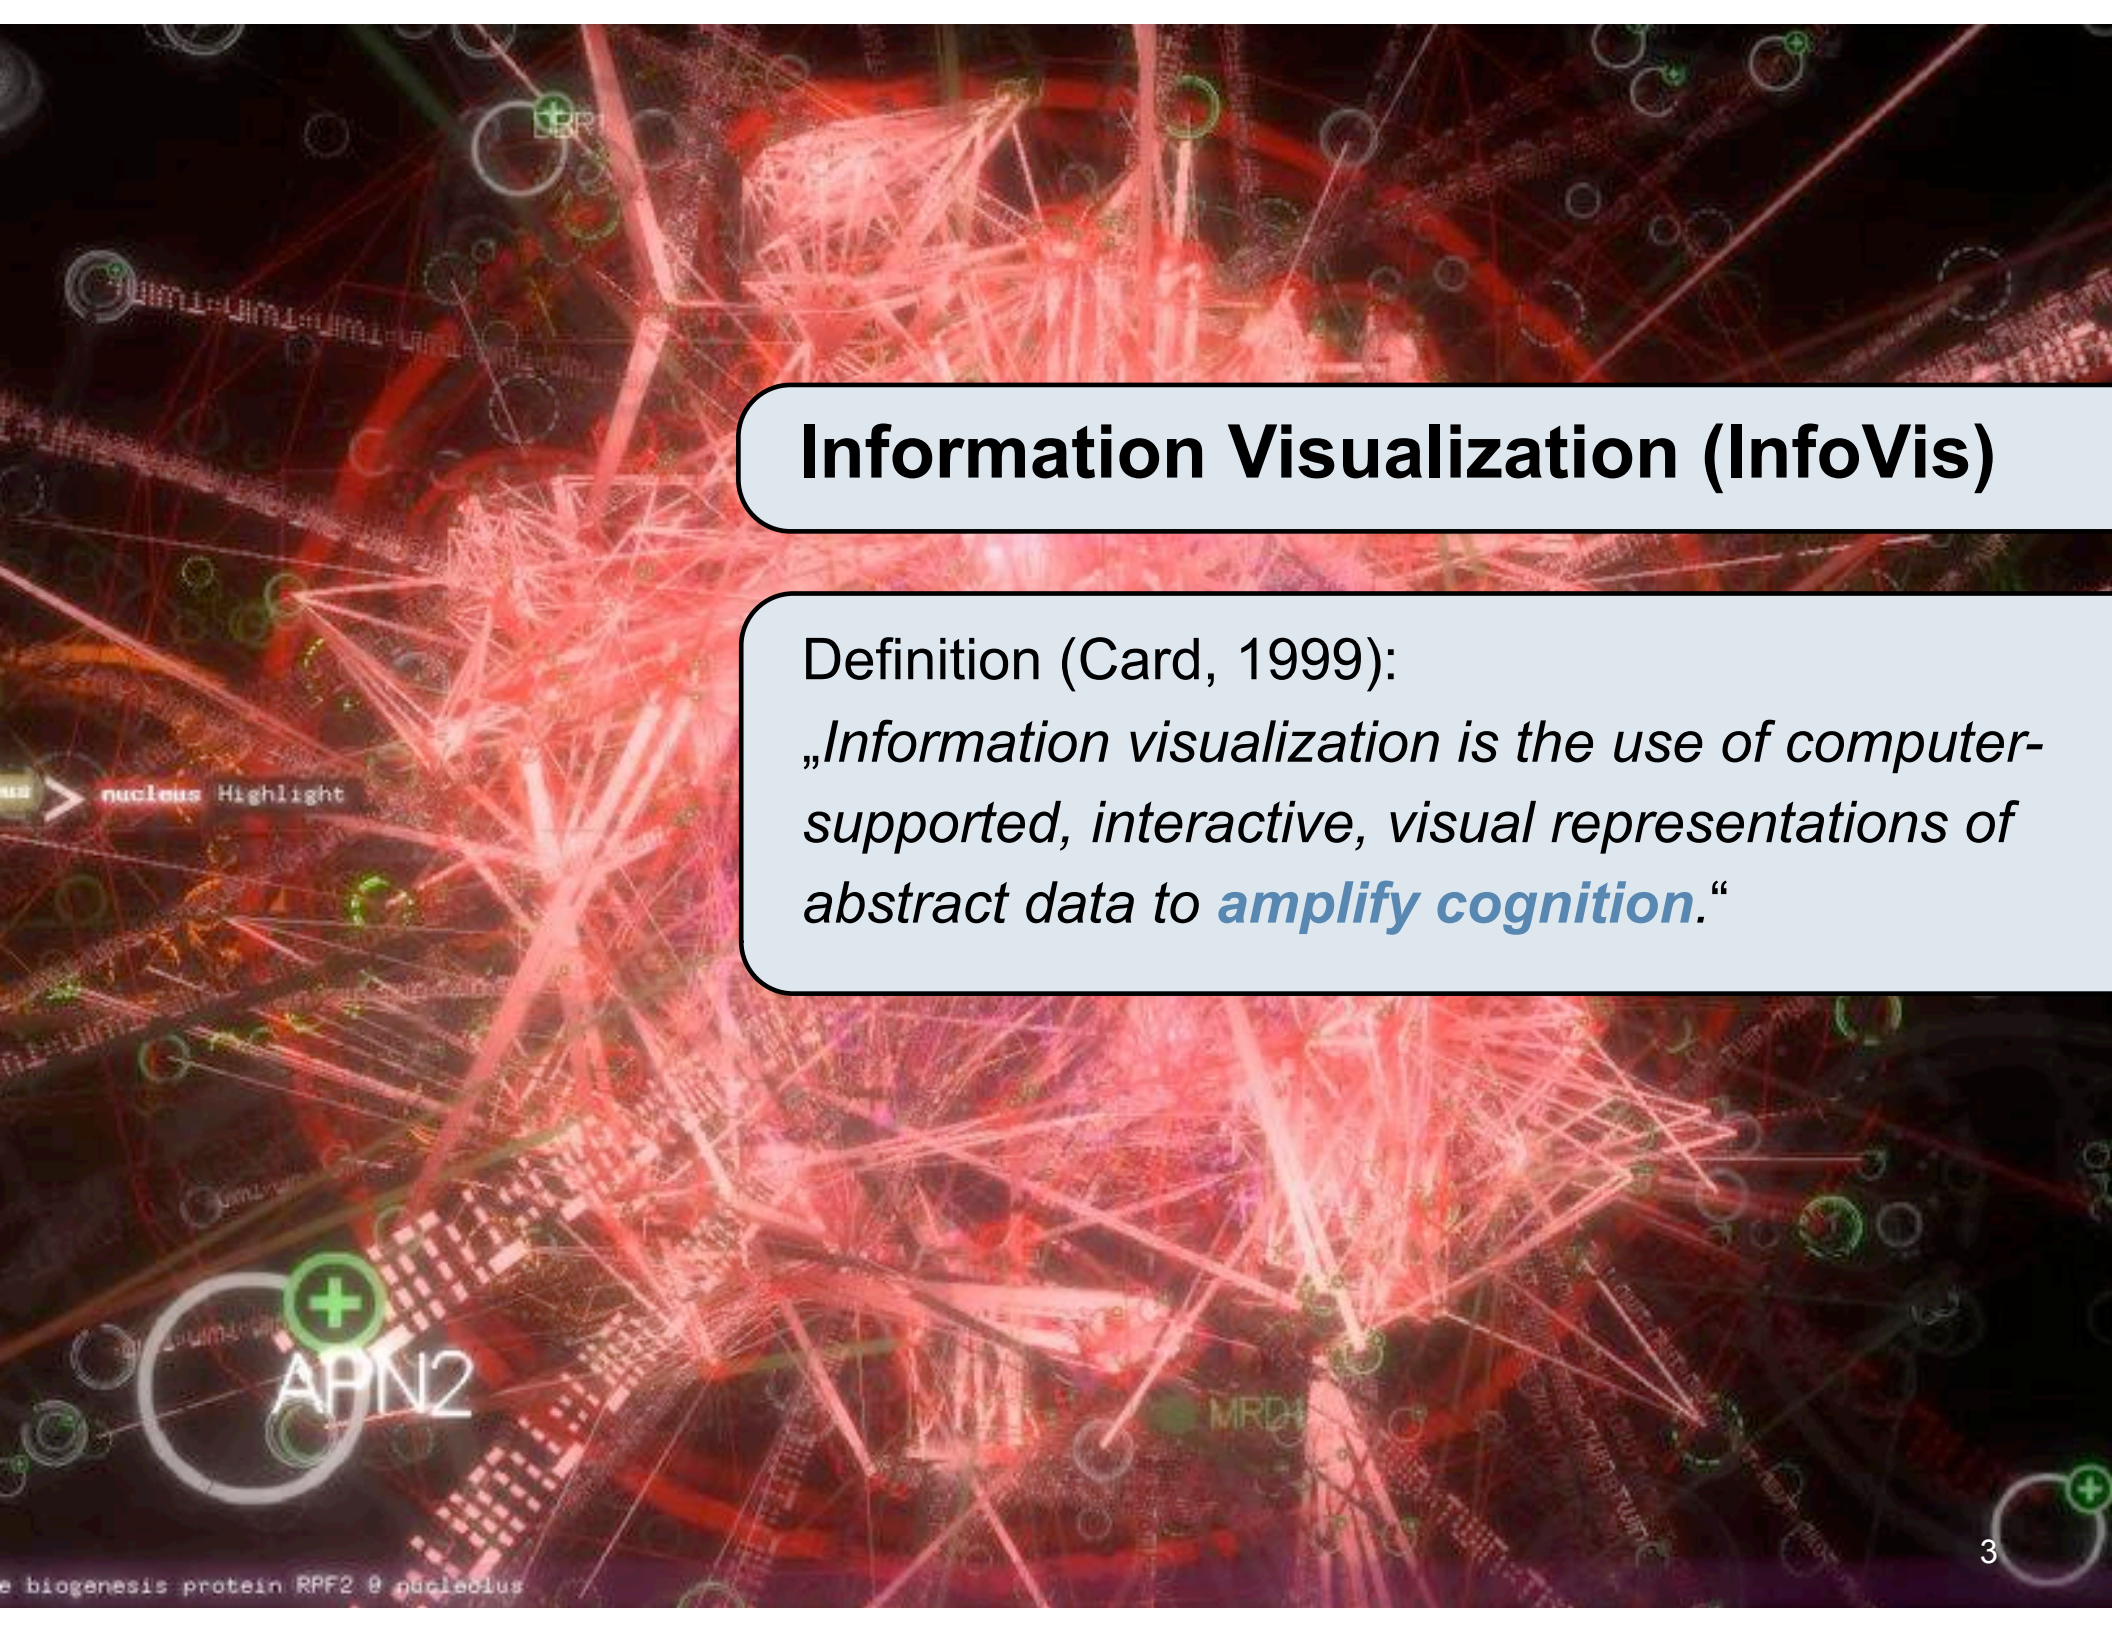
Challenge: Data Flood

Insights into this Data?

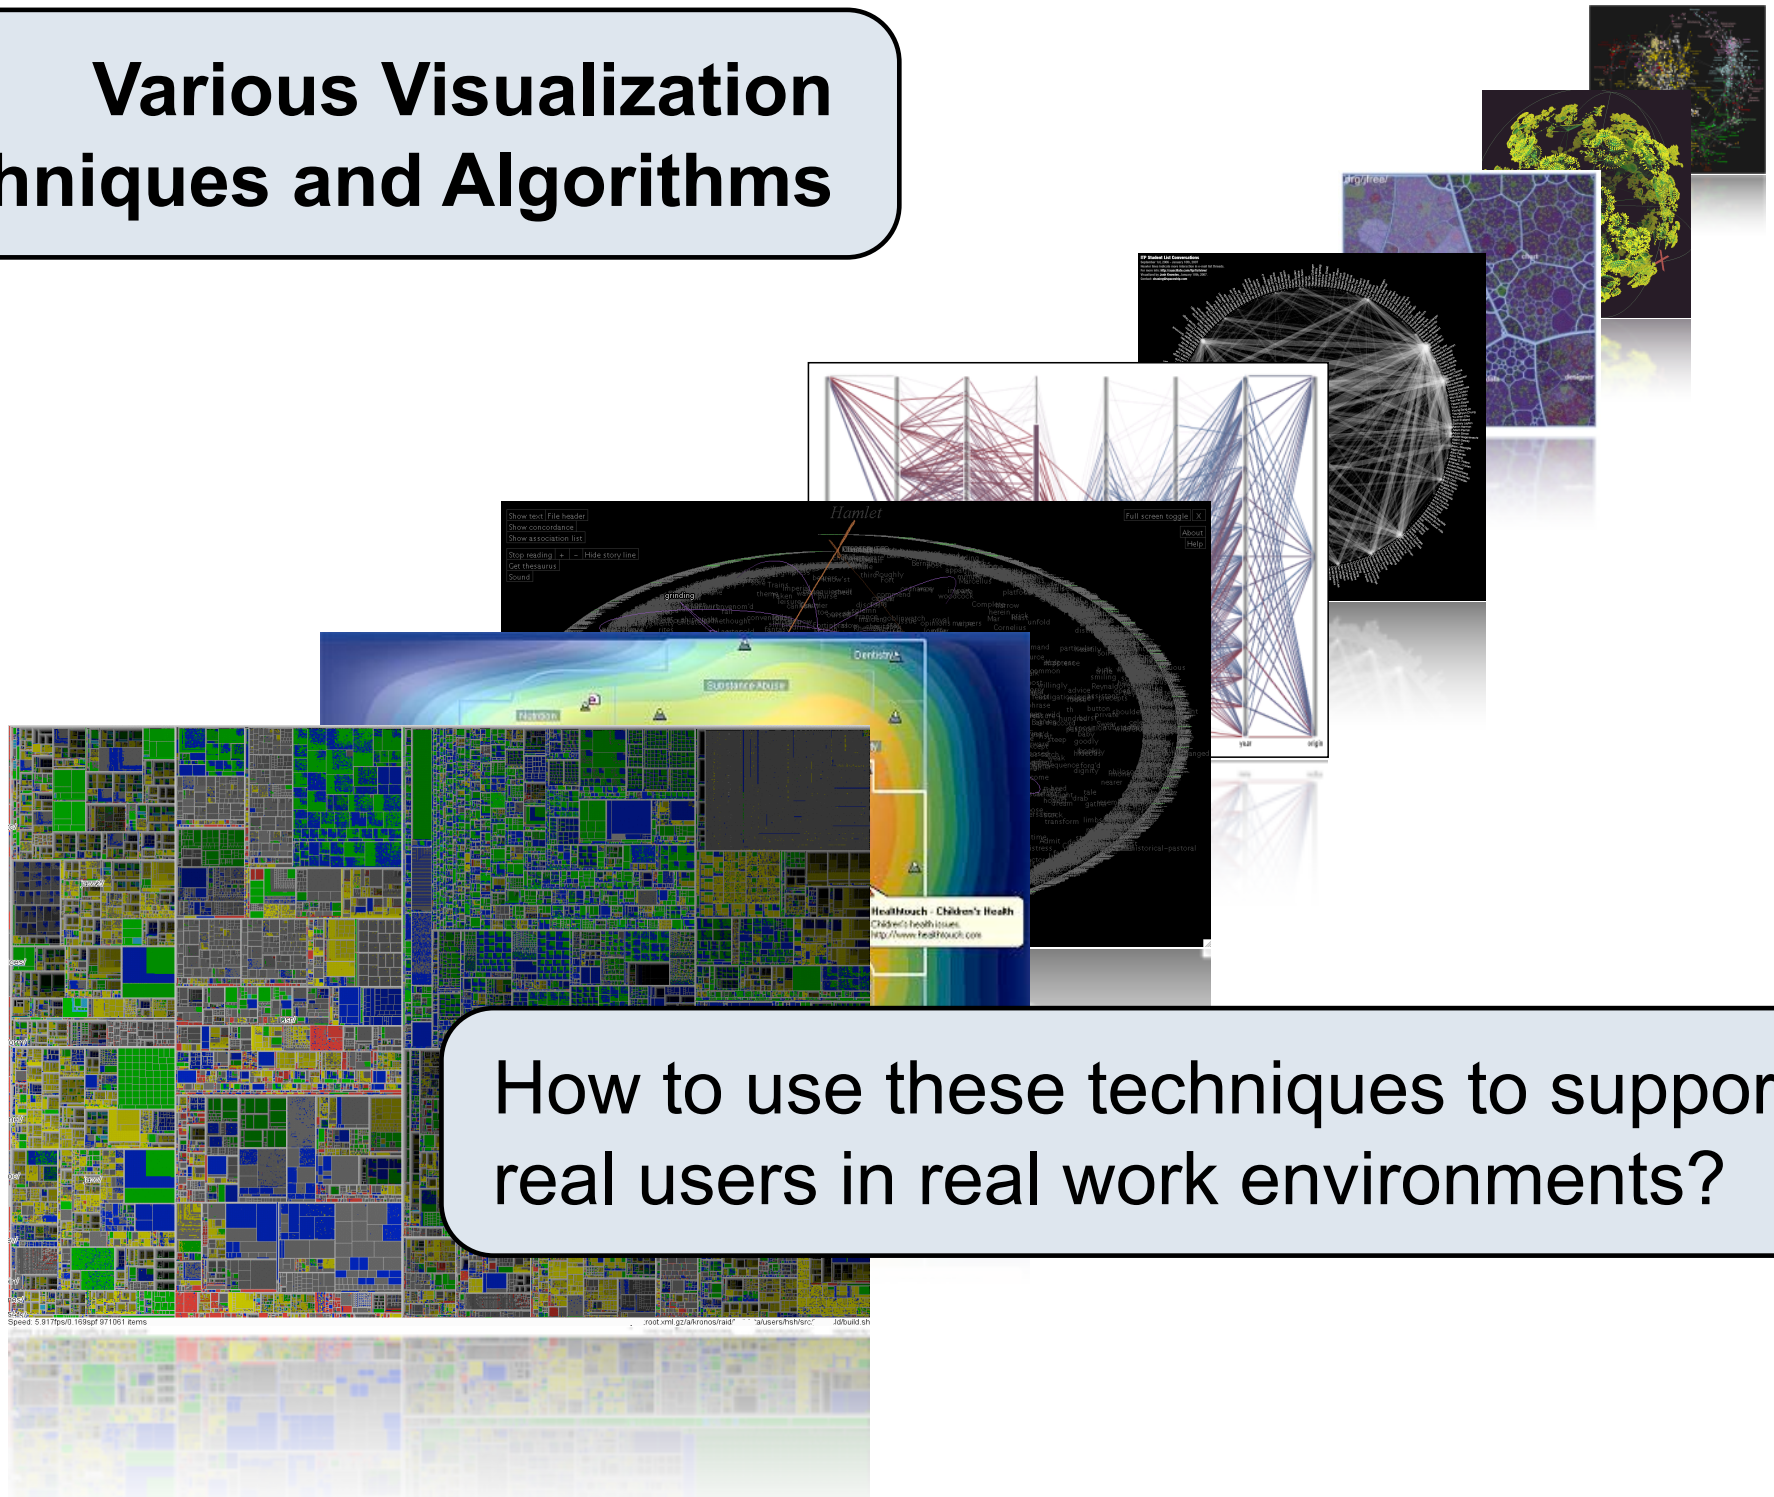


Information Visualization (InfoVis)

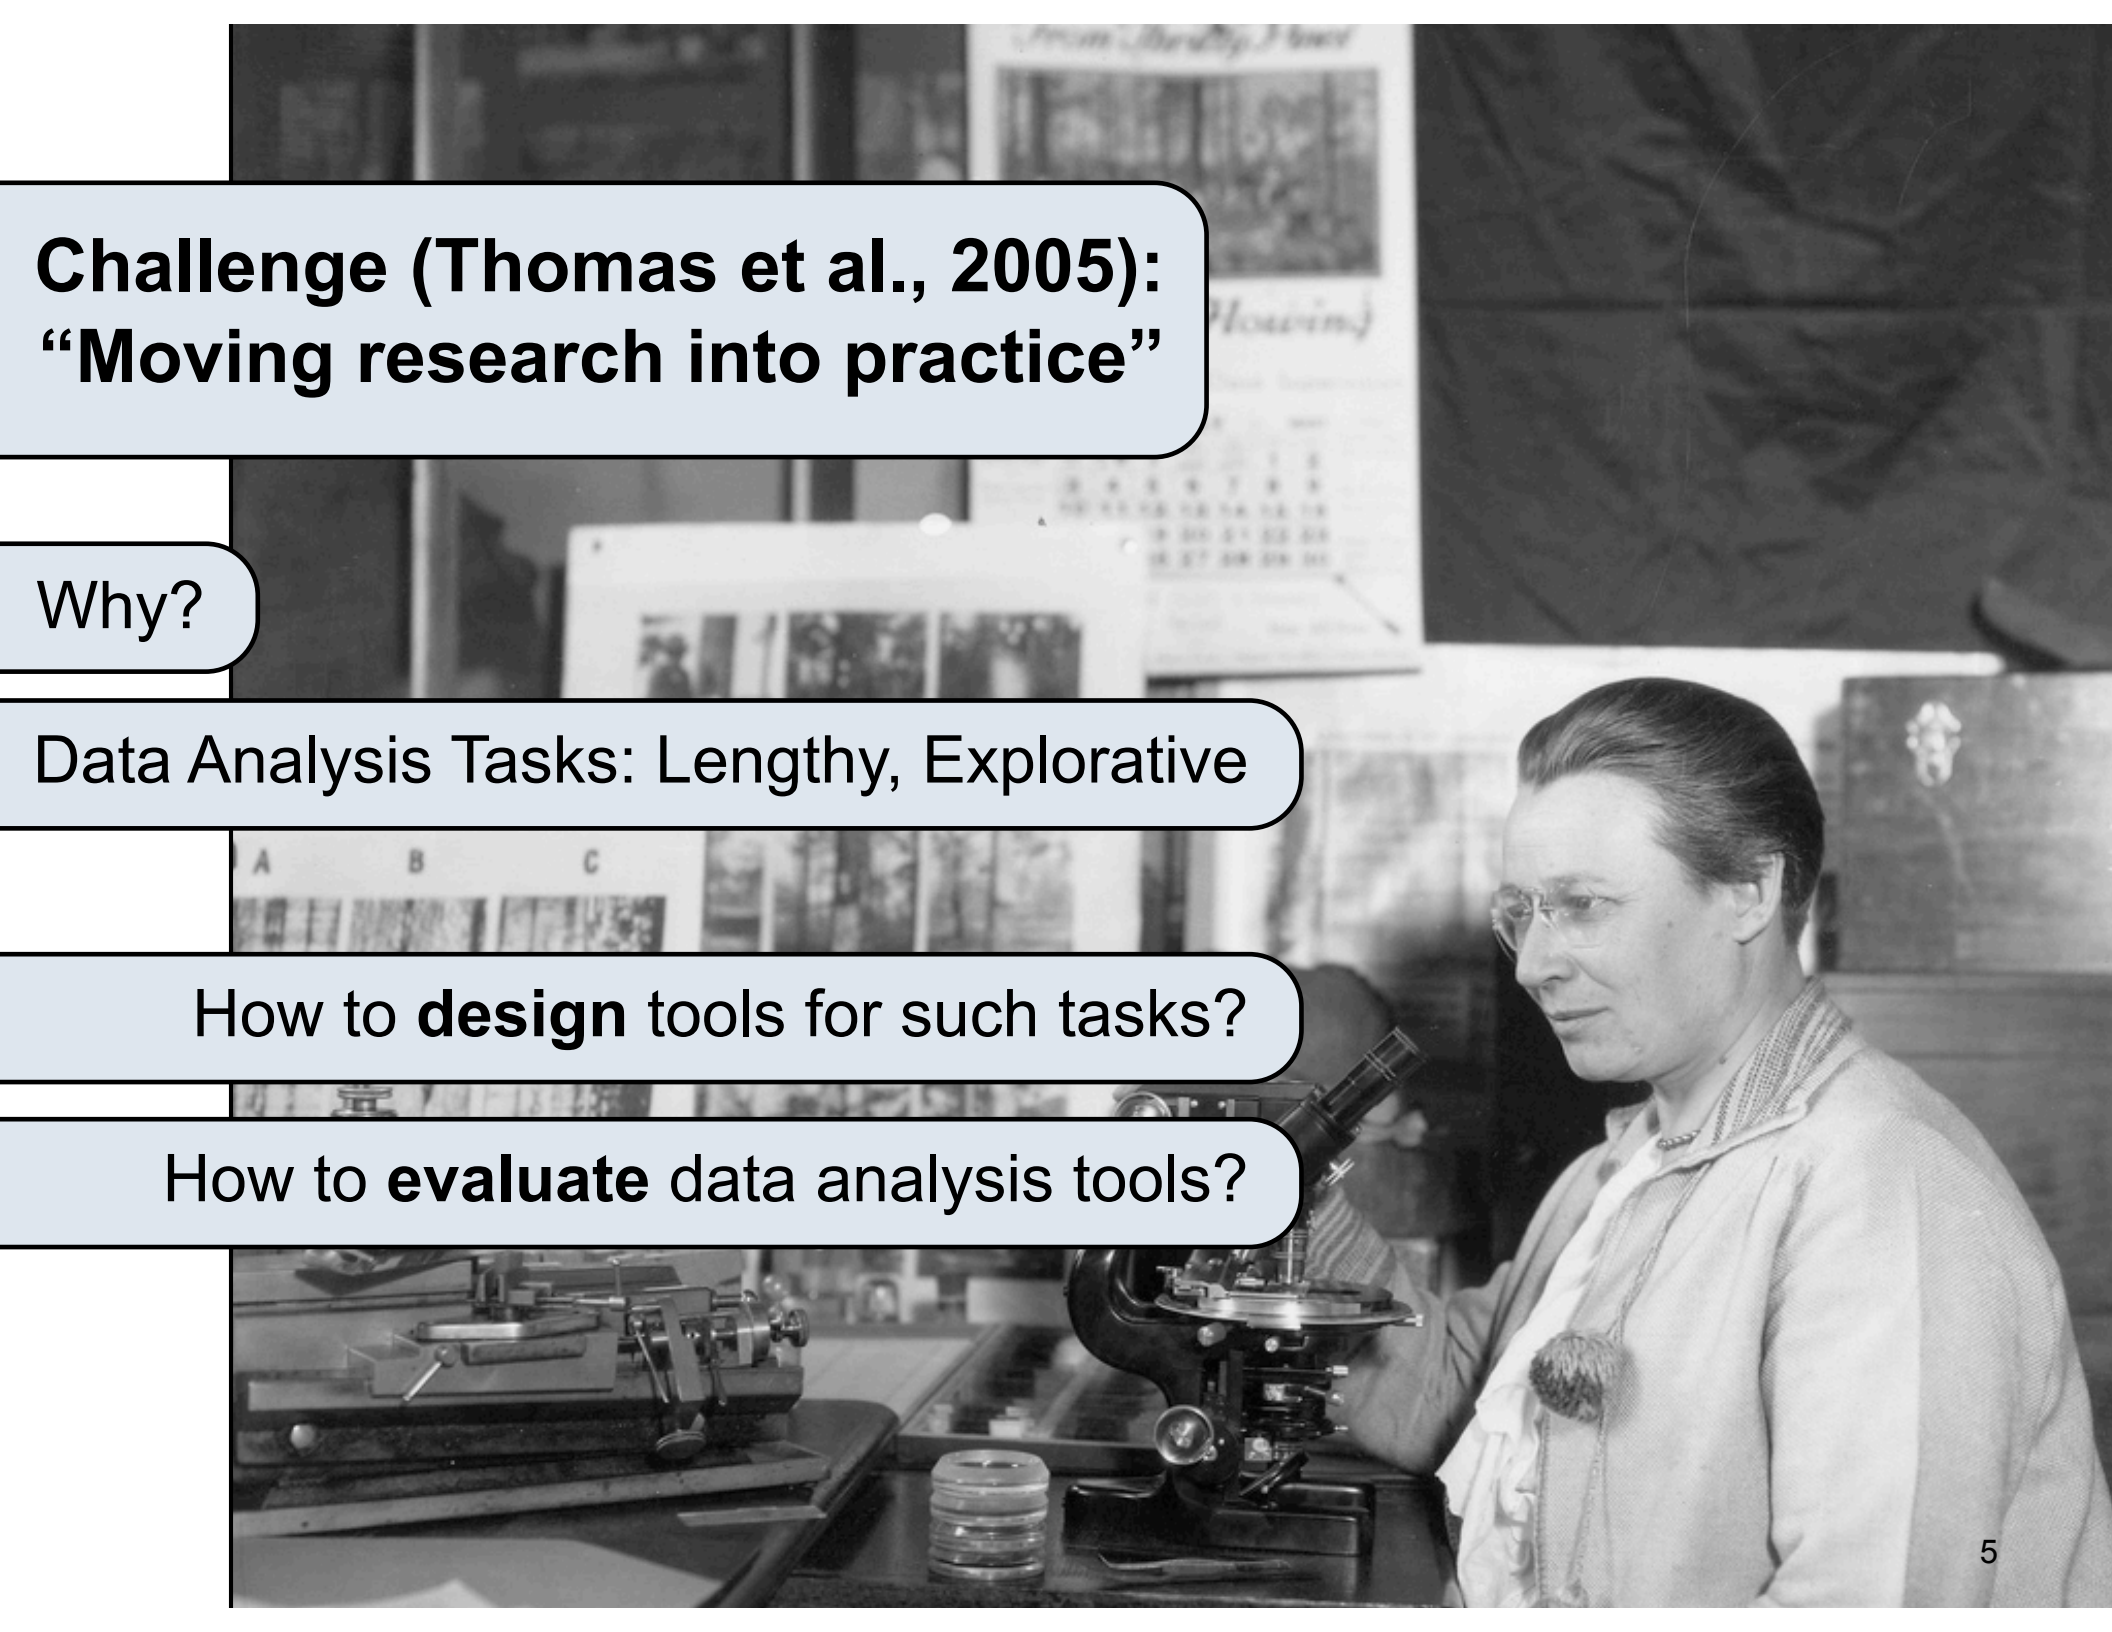
Definition (Card, 1999):

„*Information visualization is the use of computer-supported, interactive, visual representations of abstract data to* ***amplify cognition****.*“

Various Visualization Techniques and Algorithms



How to use these techniques to support real users in real work environments?



Challenge (Thomas et al., 2005): "Moving research into practice"

Why?

Data Analysis Tasks: Lengthy, Explorative

How to **design** tools for such tasks?

How to **evaluate** data analysis tools?

Challenge (Thomas et al., 2005): “Moving research into practice”

Call echoed by various researchers:

Plaisant: The Challenge of Information Visualization Evaluation. AVI. 2004.

Shneiderman, Plaisant: Strategies for Evaluating Information Visualization Tools: Multi-dimensional In-depth Long-term Case Studies. BELIV. 2006.

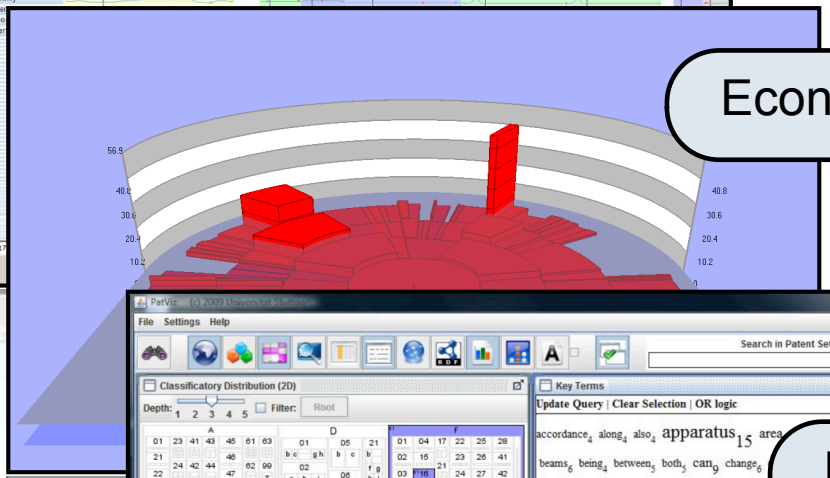
Johnson et al.: NIH/NSF Visualization Research Challenges Report. IEEE Press. 2006.

Carpendale: Evaluating Information Visualizations. In: Information Visualization: Human-Centered Issues and Perspectives

Munzner: A Nested Model for Visualization Design and Validation. InfoVis. 2009.

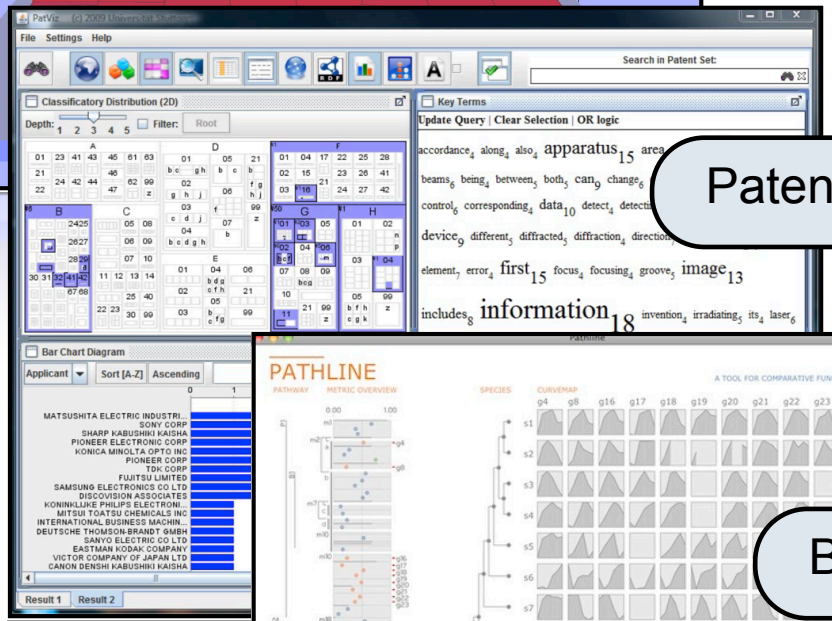
System Management Professionals.

McLachlan et al.: LiveRAC - Interactive Visual Exploration of System Management Time-Series Data. CHI. 2008.



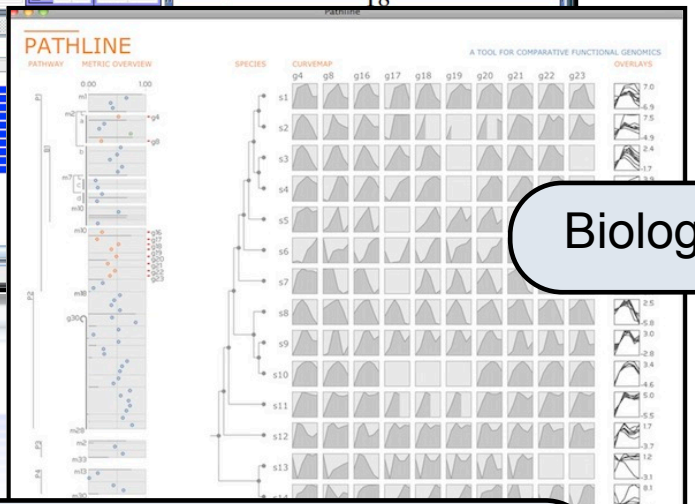
Economic Analysts.

Tekusova, Schreck: Visualizing Time-Dependent Data in Multivariate Hierarchic Plots - Design and Evaluation of an Economic Application. IV. 2008.



Patent Agents.

Koch et al.: Iterative Integration of Visual Insights during Patent Search and Analysis. VAST. 2009.



Biologists.

Meyer et al.: Pathline: A Tool for Comparative Functional Genomics. EuroVis. 2010.

End-User Collaboration in InfoVis Projects

Moving Research into Practice ...

Automotive Engineering

Within Large Company Setting

Long-term, In-depth Collaboration

Main Contributions.

I) 3.5-year, In-depth Field Analysis.

II) 9 Design Studies / 5 Adopted Systems.

III) Challenges and Recommendations for Studying InfoVis Tools in a Large Company Setting.

- *Conclusions*: Summary and Future Work

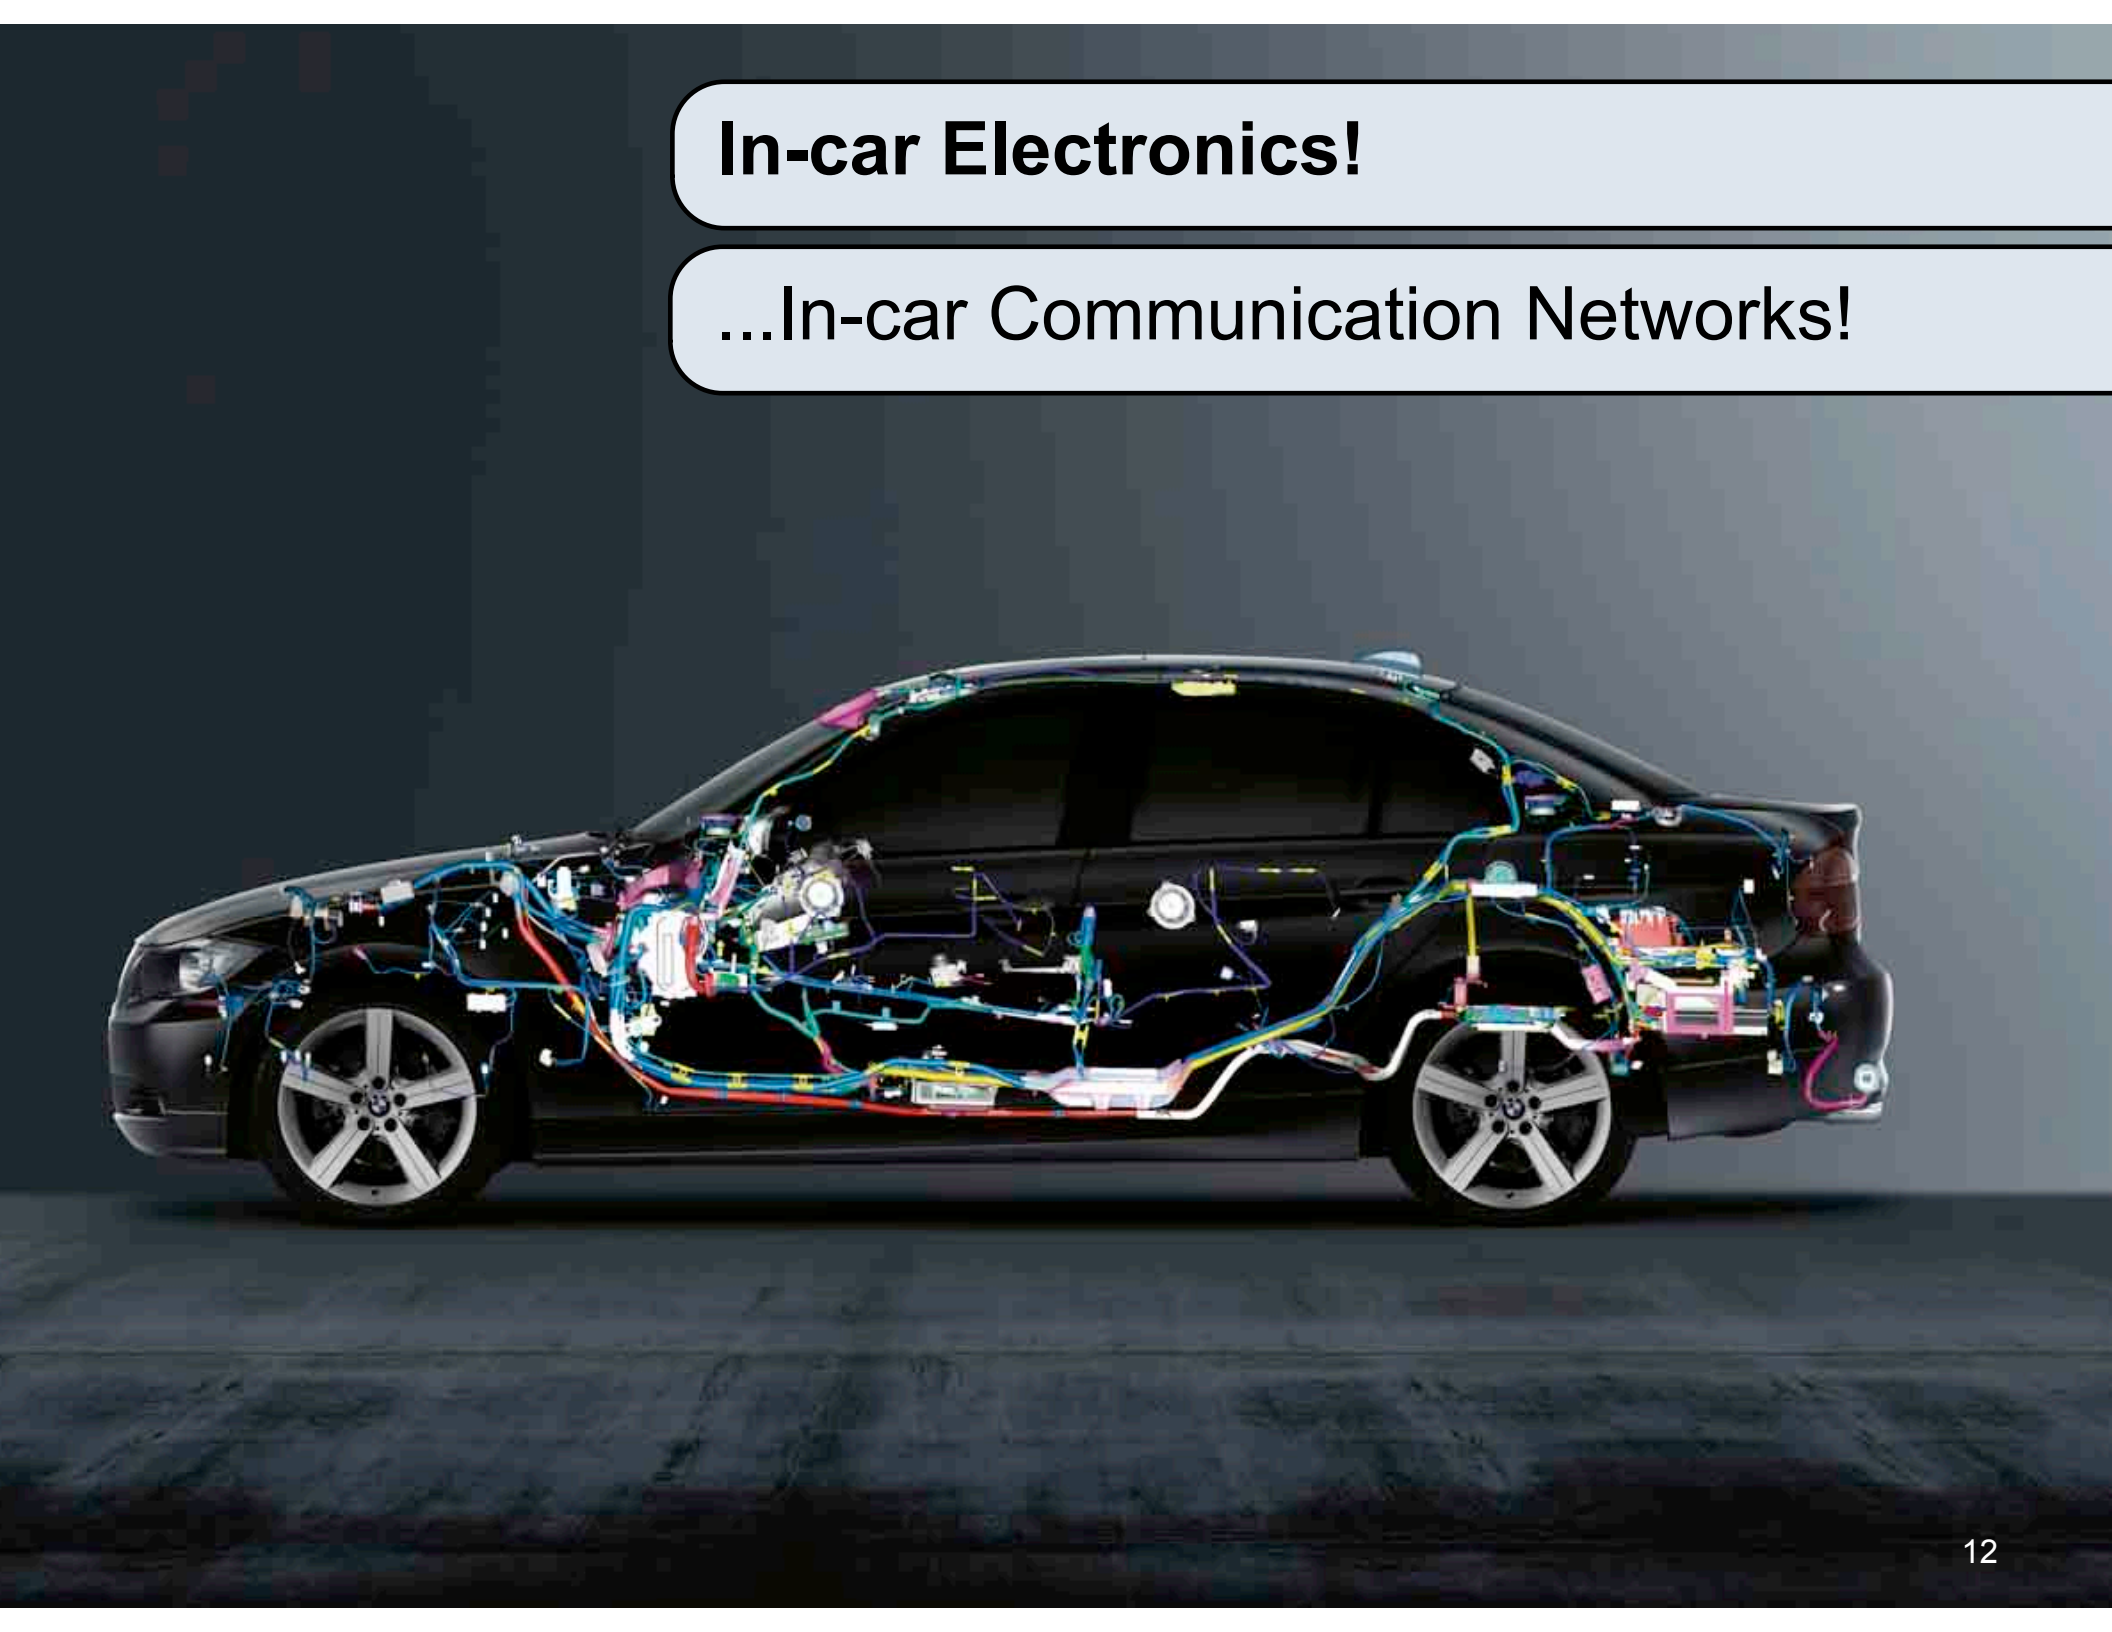
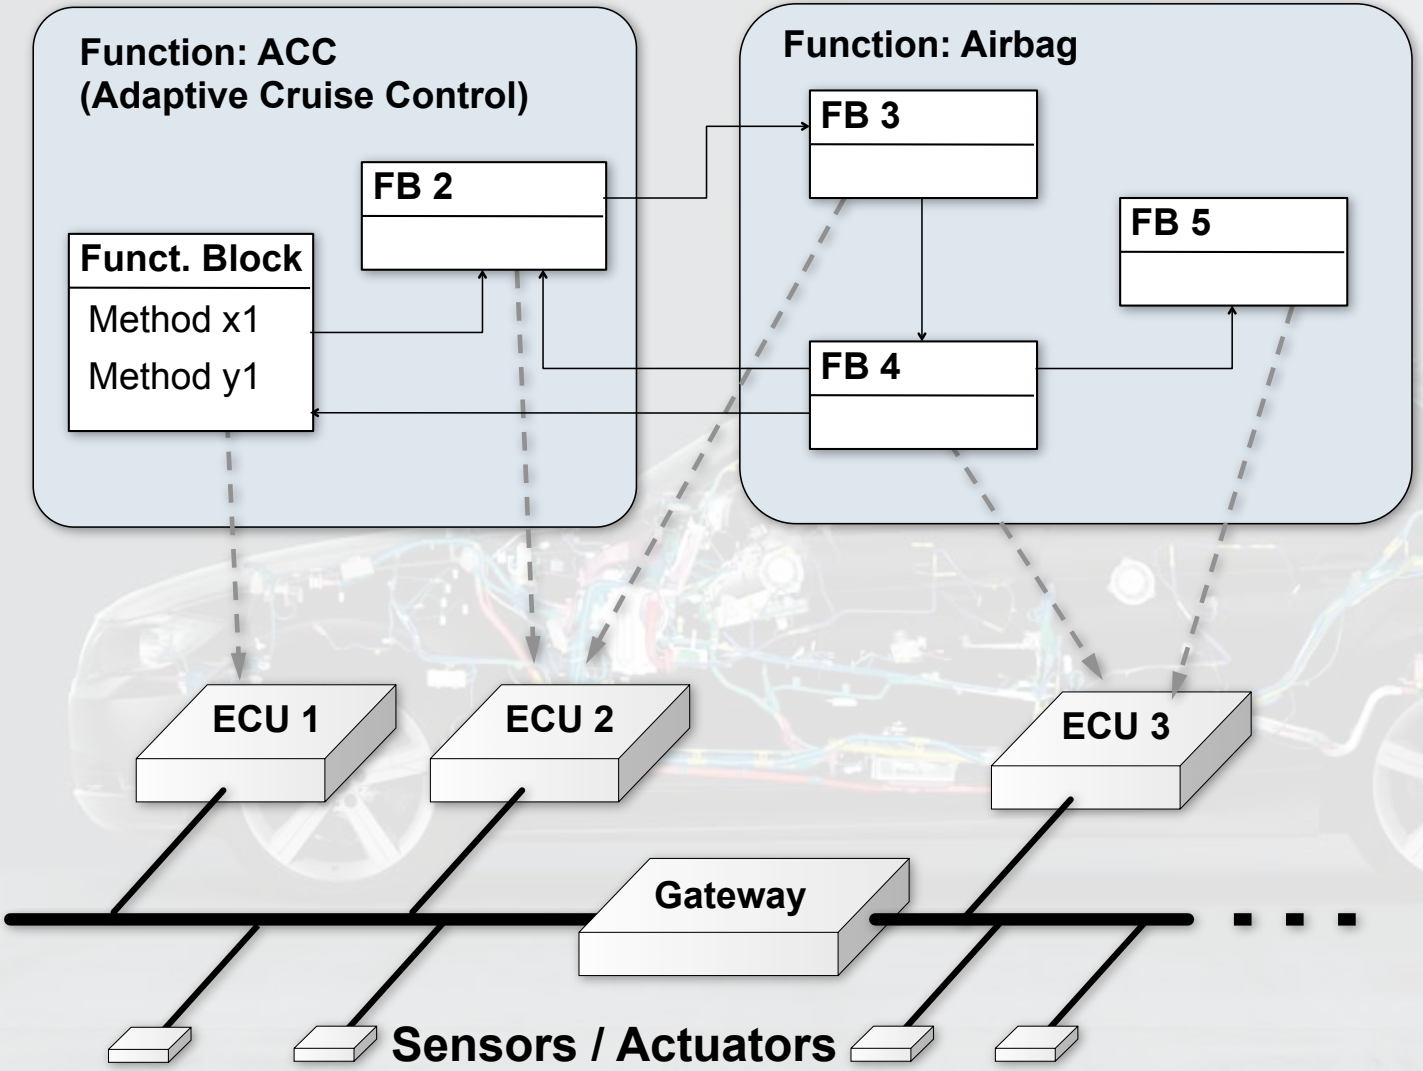
In-car Electronics!

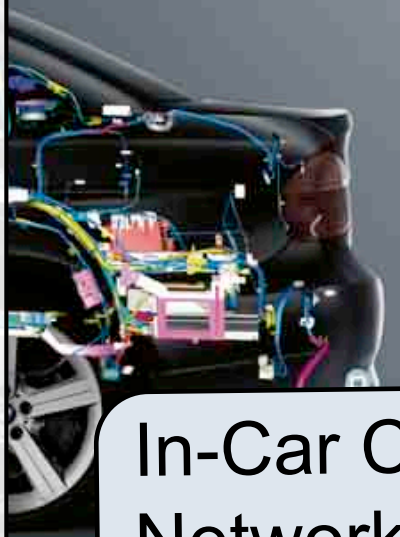
...In-car Communication Networks!



What are In-car Communication Networks?



Functional Network



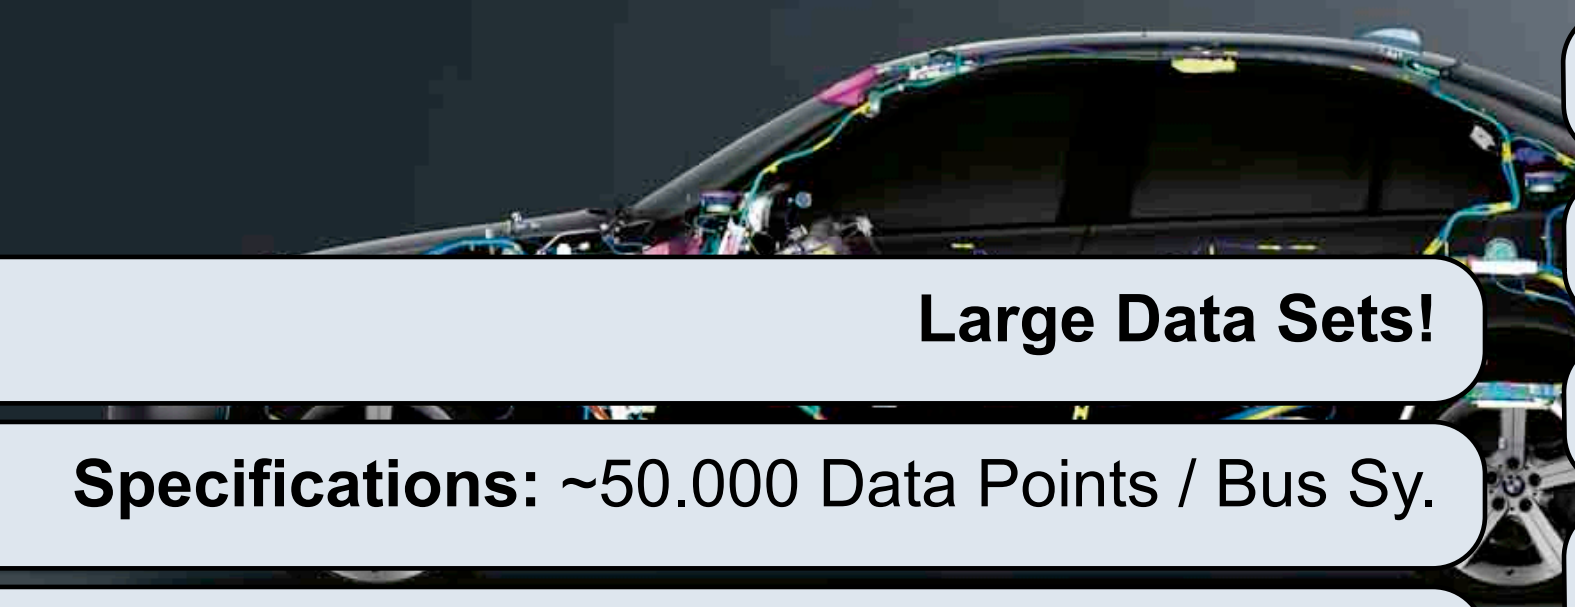
In-Car Com. Network

Exchanging Signals packed in Messages

What is the problem?

More and More Functions...

... Increasing Complexity!



~400 Funct.

~70-80 ECUs

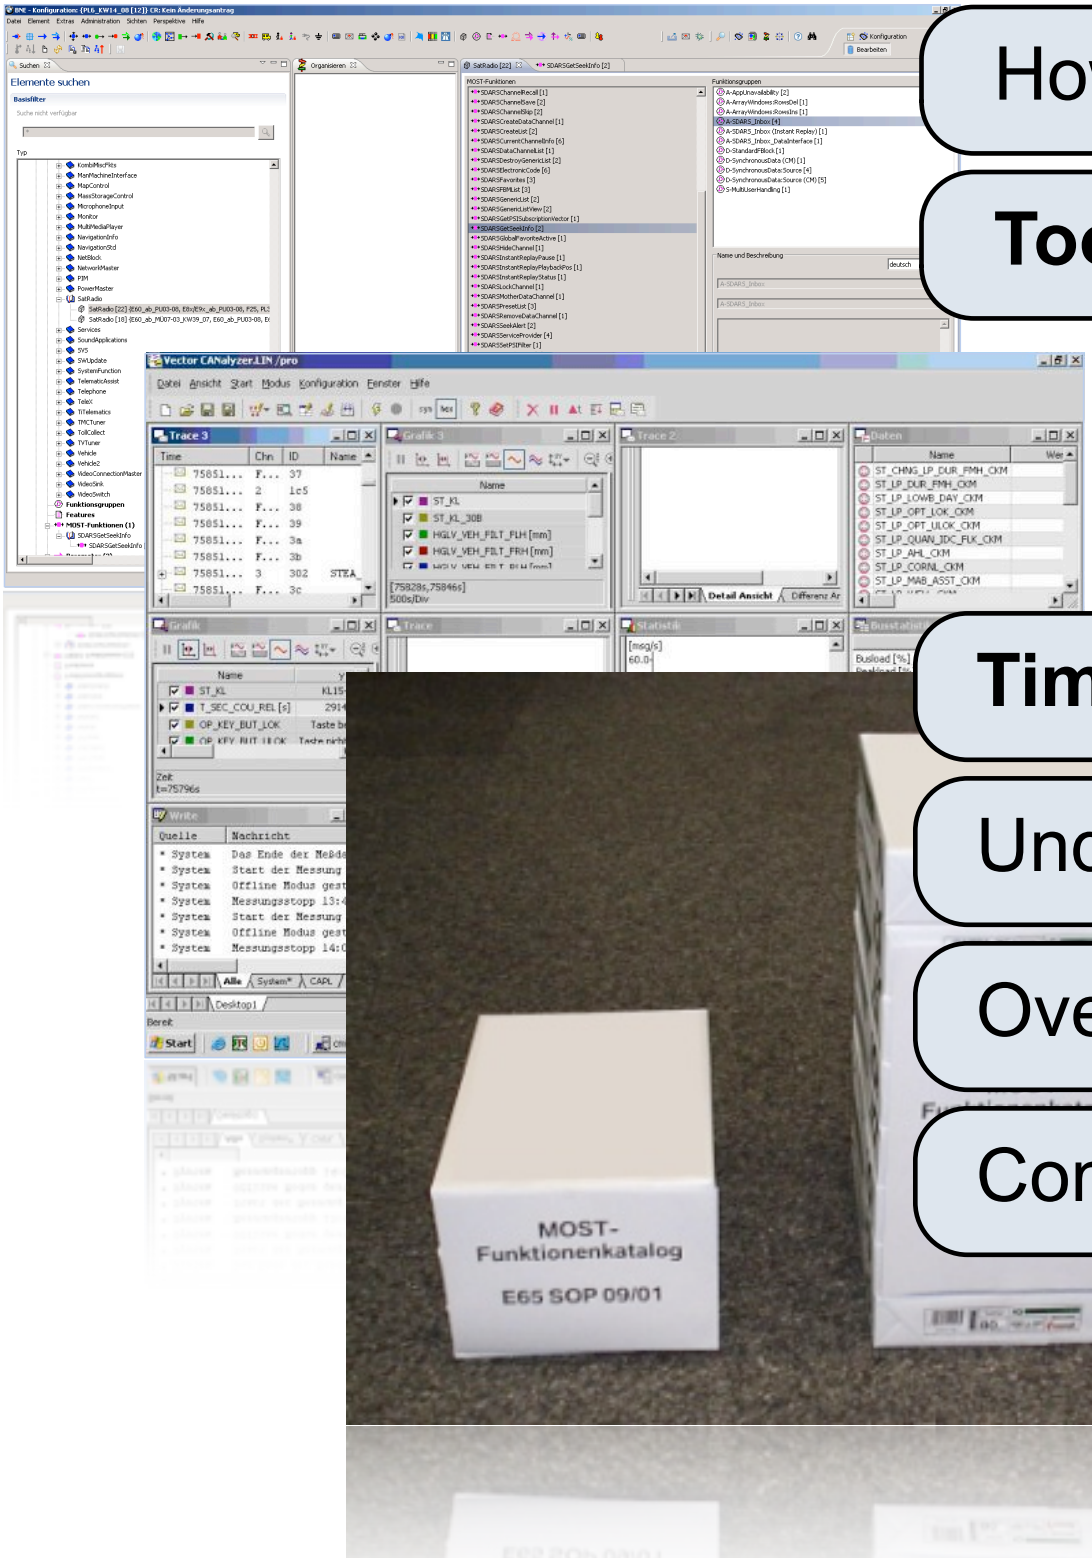
~10 Busses

~15.000 Messages/ s

Large Data Sets!

Specifications: ~50.000 Data Points / Bus Sy.

Traces: ~50 million Messages / Recorded Hour



However...

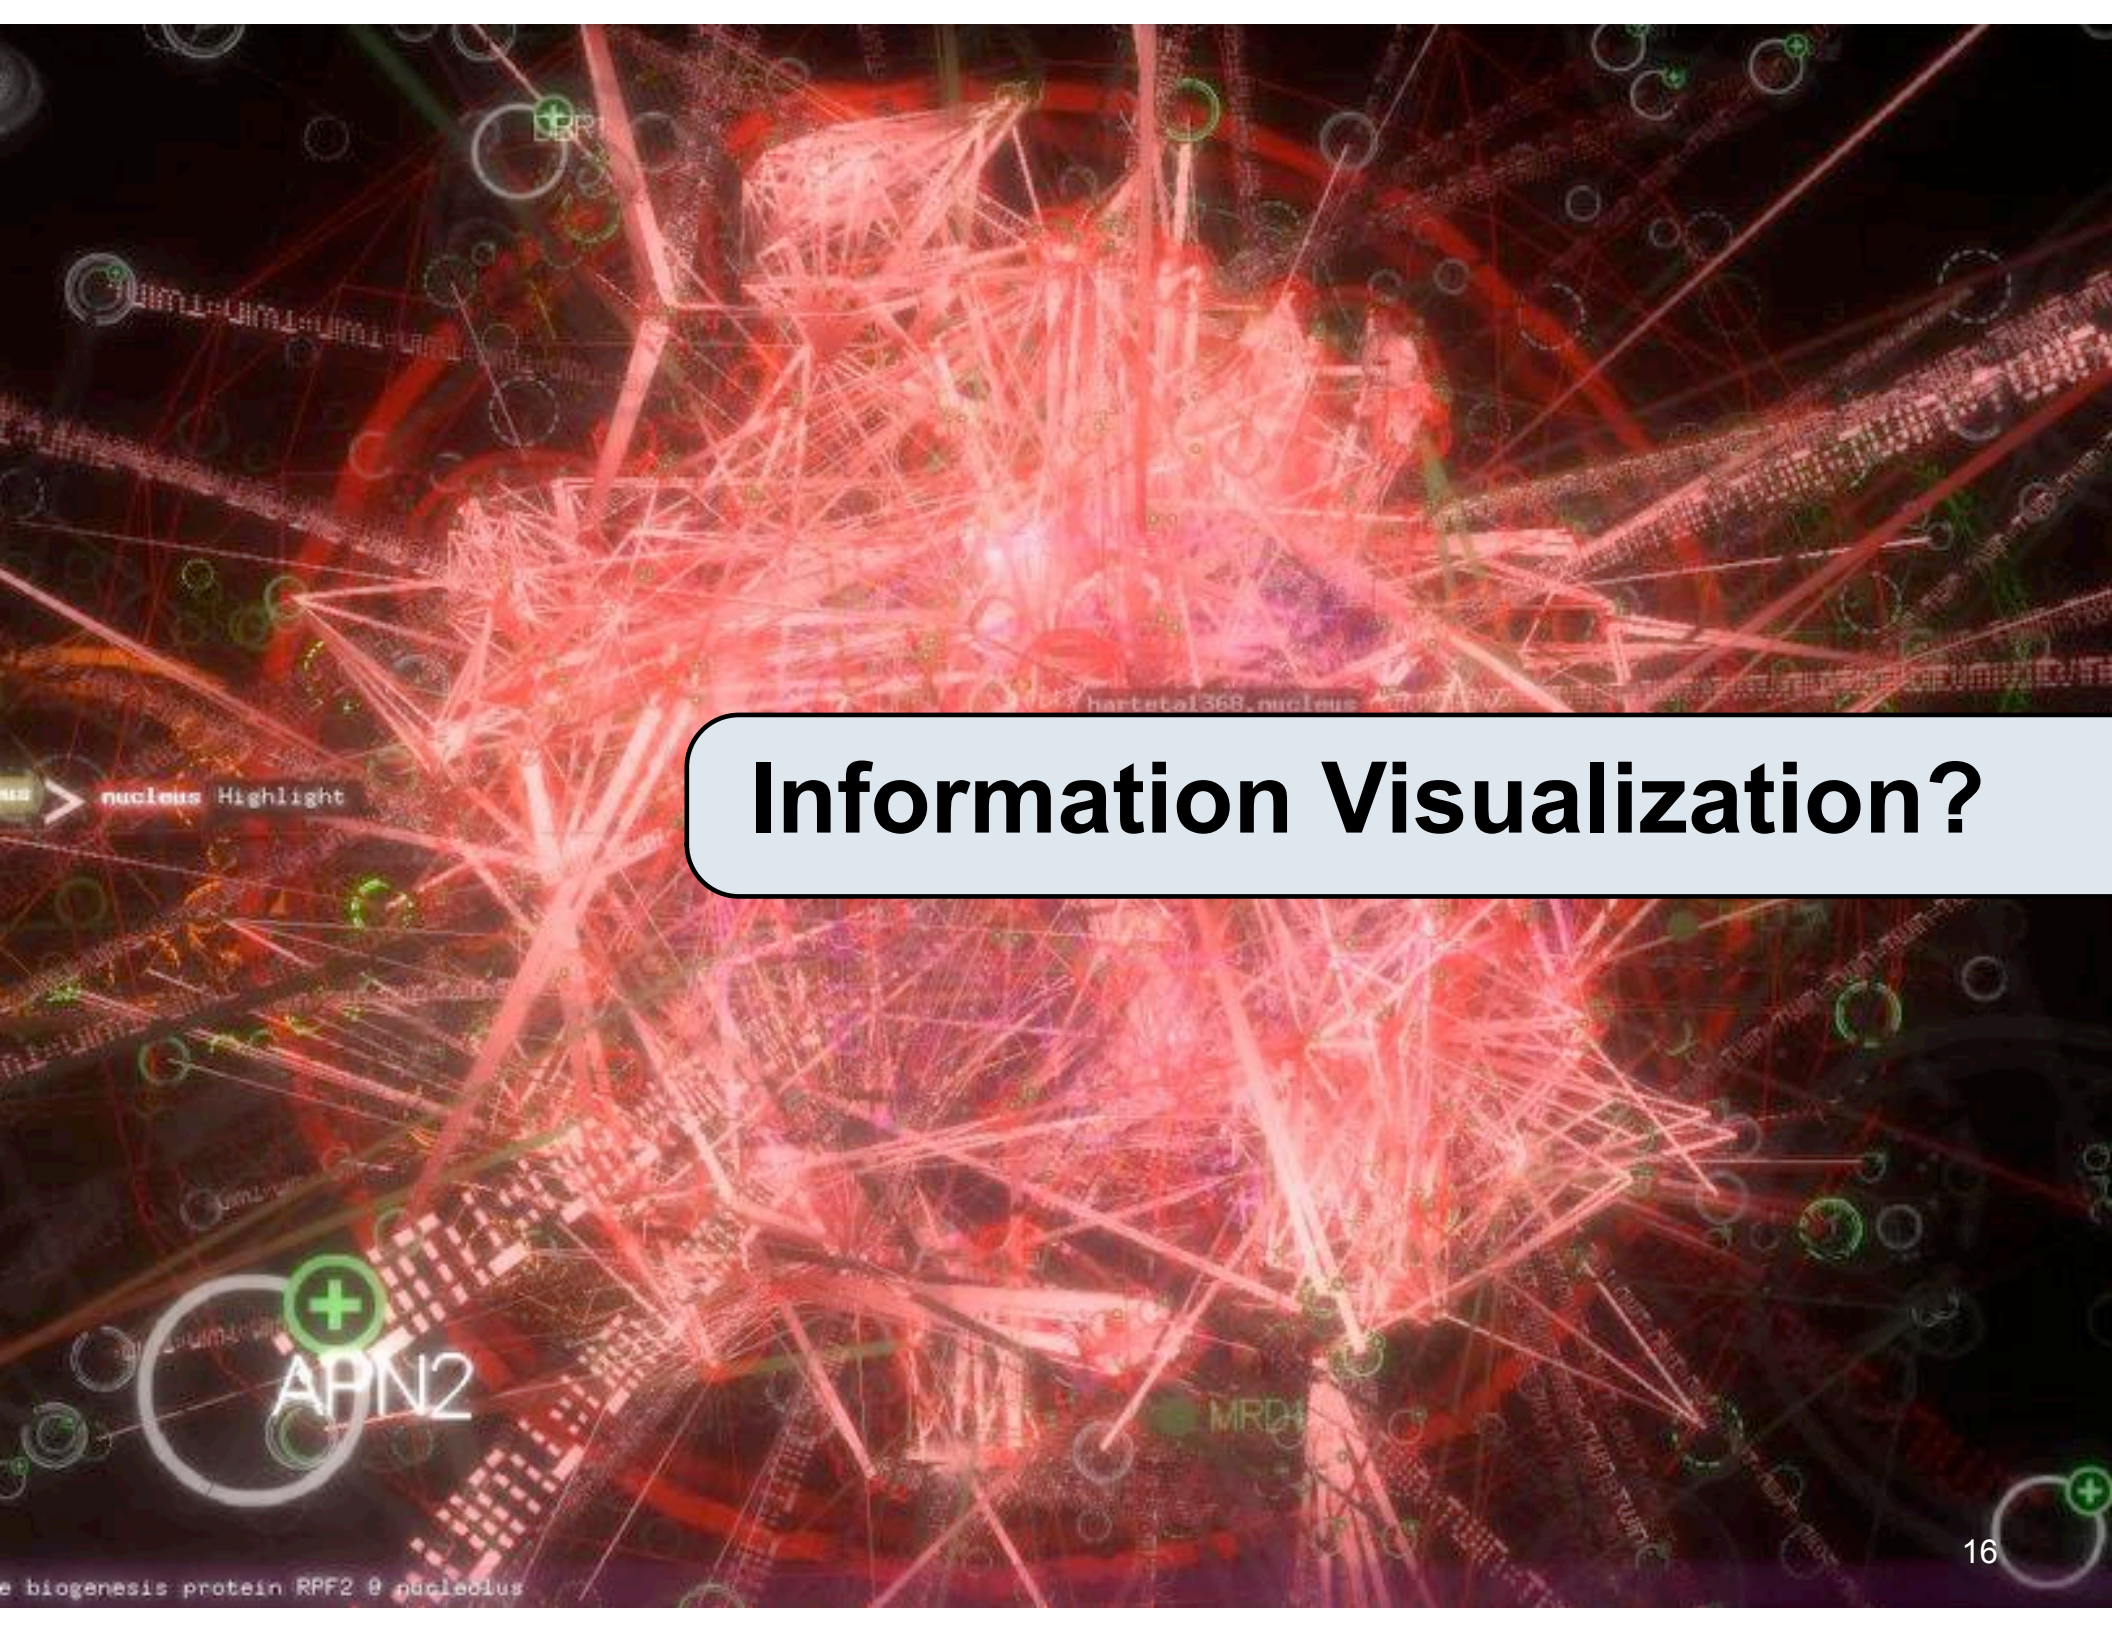
Tools are still text-based!

Time and experience required!

Understand Correlations?

Overview?

Communicate Findings?



Information Visualization?

Michael Sedlmair
msedl@cs.ubc.ca
